## Innovation

**Real-time reporting via mobile email;** All Cleantech supervisors carry iPhones equipped with mobile email and camera for easy communication while on biweekly site visits.

**Vert-2-Go Oxy** is a unique combination of modern day surfactants and hydrogen peroxide blended together to form a product with effervescent cleaning action.

## Announcing Elaine Rogers Business Development Manager

Elaine comes to Cleantech from a multi-faceted international facilities management corporation, having seen the potential for great career strides in our team-oriented, young, and progressive company. In the past several years, Elaine has worked with national clients in the downtown core and outlying areas, providing support to both the public and private sectors. With a degree in marketing, Elaine is dedicated to understanding customer

needs, and developing a program to fit their janitorial needs. She looks forward to meeting with our existing clients and forging relationships with new prospects.
